About the organization

This logo symbolizes the objectives of the organization.

- The words in the outer circle are from the great Indian epic "Mahabharat", saying that "nothing is above a Human". This is also the motto of the organization.
- The triangle in the inner circle symbolizes the hands of three people and stands for community development through participation.
- The light from the lamp in the small but in the centre symbolizes the development of the weakest and poorest person of the community.

Founder trustees of the organization were inspired by Gandhian thinking and work of great men like Albert Schweitzer. They felt deeply the agony and hopelessness of poor villagers. They saw the plight of villagers and felt a need of medical services in these villages. Hence they brought like minded friends together and founded Gram Seva Trust, an organization dedicated to rural health and development.

In 1994 the trust started a 30 bedded hospital with 5 staff members in an old dilapidated building, given by another trust. As the need arose the hospital was expanded to accommodate more patients and better services. Today the hospital can accommodate 100 patients and has all basic facilities required in a rural hospital providing health services at affordable rates and sometimes free of charge to the needy from nearly 300 surrounding villages of Navsari and Dang districts.

The organization also wanted to improve health of the surrounding villages hence as and when need was identified different community projects were started in the surrounding villages with main focus on health and development of women and children. Immense efforts are put in to decrease malnutrition. Gram Seva Trust also reaches out to the tribals in deep interior villages of Vandsa and Dang through satellite centers and general medical mega camps arranged every year.

The organization has also started different projects for development of villages like Self Help Group project (a micro saving and micro lending project for women), trainings for income generation activities, adolescent girl project, tutorial classes to strengthen primary education and a Child Education and Development Centre to improve standard of education in children of landless labourers.

Vision

- Healthy, Happy, Self sufficient and Self-Empowered Rural communities.

Mission

- Cater to the Health need of every individual in the society irrespective of caste, creed or economic status.
- Render special care to women and children of our society.
- Promote curative and preventive measures in order to improve the general well being of the society.
- Uplift social and economical status as well as rural development with scientific and rational approach.
- Create awareness for healthy qualitative life and development.

Homage

Since last 2 years the world has been facing Covid 19 pandemic. Many precious lives were lost untimely, to this pandemic. Gram Seva also lost many patients, well – wishers and doctors, in India and abroad, due to covid 19 infection. We would like to pay homage to all those who left us and their families, unexpectedly and before time. They will always be remembered by us. We pray for strength to all families to bear this great loss. Gram Seva shall continue to work for the poor and needy and help as many poor patients and downtrodden people as possible as a tribute to them.

Hello friends,

As you all know Gram Seva has completed its Silver Jubilee last year and entered the 26th year of its activities. Everyone has good and bad memories in their life, which they remember till the end. This Covid 19 pandemic is one such memory for us. The year has been very difficult, with the pandemic, lockdown, government restrictions, ongoing hospital services, basic primary needs of the community, obstacles in education of Parodh Balawas children etc. We hope that the whole world will be free of this pandemic soon.

I am very happy to present before you the annual report of the organization for the year 20-21. The hospital services continued in these trying times. But we could not conduct our general camps and eye camps. Yet we tried to reach to the community through our new satellite centre at Bhinar, DEIC centre, Childline Services, Public Library for children, Financial Literacy Workshop, Kitchen Gardens, "AAA" project in Dang, Mental Health Project, "Shabri" Women's Development Centre, "Sangee" Sanitary Napkins Project, Blood Donation camps, Student dialogues etc.

Many of our staff members have over the years inculcated our values and principles. They have evolved as seniors and are ready for newer responsibilities. We have decided to handover the responsibility of preparing our newsletter "Samvedan" and our annual Report to this team, so that we can present to you our activities in novel and creative ways.

You all have been our well-wishers and companions in this journey of 26 years. We hope that your support, opinions and guidance continues in future, as we continue our journey to reach to the poorest and remotest person for their health, education and livelihood.

30th November, 2021
Kharel

Thank you,
Dr. Ashwin Shah,
(Managing Trustee)
On behalf of Gram Seva Family

We request you all to visit our new website www.gramsevatrust.org

New Projects

Community Tribal Health and Rural Livelihood Project, Dang "AAA"

While conducting women's health checkup camps in Dang district, we realised the need for a comprehensive health and development project in those villages. Hence we selected 25 villages in Waghai block with this objective. Weekly mobile medical clinics are being conducted in these villages. We have also selected village level workers, who shall help us in providing health and development services in women's health, child health and non-communicable diseases and also screen and follow the patients and generate health awareness. Women are also being trained in manufacturing sanitary napkins and sewing. The project is being conducted with the support of Manav Kalyan Trust, Shivarimal and monetary funding by Aspi Charitable Trust, Mumbai and UHRU, U.S.A.

'Abhinav' Navsari District Early Intervention Centre (DEIC), Kharel

The hospital was selected for implementation of District Early Intervention Centre for Navsari. The centre aims at screening and management of deformities, deficiencies, diseases and disabilities in children aged 0 to 18 years. All children in this age group with any of the above problems can now be sent to this centre for screening, diagnosis and management. A team of doctors, physiotherapist, dentist, paramedical workers, psychologist, special educator etc. shall manage these children. Children and their parents shall be counselled regarding their management at the centre and at home. They shall be followed telephonically and physically during follow up sessions. Thus a comprehensive approach shall be available for management of developmental and major health problems in children.

Table 1:

Health Problem	Boys	Girls	Total
Congenital defects	46	42	88
Malnutrition	31	30	61
Delayed Development	54	37	91
Others	31	24	55
Total	162	133	295

Mental Health Project

Mental health is the most neglected of health problems not only by community but also by the healthcare system. But we all know that people are truly healthy only when they are both, physically and mentally healthy. Yet with changing lifestyles, stress and factors like lockdowns, social distancing etc. we are seeing a surge in mental health patients both in OPD and indoor. Every year about 20 suicide cases and 60 alcoholic patients are admitted in our hospital. About 30 to 40 patients attend the psychiatry clinic every month. Hence the organization felt the need for a comprehensive programme for identification (door to door screening), medical management and rehabilitation of mentally ill patients, in 18 villages, with the help of team of field workers, counsellors and psychiatrist. There is also a need to generate awareness in community regarding mental health. This project has been supported by UHRU, U.S.A and technical support by Ms. Nimittaben Bhatt and Dr. Ashwin Patel (Trust for Reaching the Unreached, Vadodara).

Van Arogya Kendra(Satellite Centre), Bhinar

Villages in Vansda block are about 40 to 60 kms. away from Kharel. Yet many patients come to Kharel hospital for health services. Sometimes they travel this distance even for minor health problems. Hence we have started a weekly dispensary at Bhinar village with the help of Mr. Ramanbhai Patel, Jan Kalyaan Saamaajik Seva Trust, Bhinar. Our team of doctors and paramedical staff visits the centre every Wednesday and provides Gynaecology, Paediatrics, General medicine and laboratory services.

Covid Relief Activities

Covid 19 pandemic affected the health, infrastructure and the economic status of the whole world. The people in the surrounding villages are tribals and economically poor. Covid 19 pandemic lockdown has further affected their economy. Gram Seva has been trying to help the patients coming to the hospital for medical services, by continuing its hospital activities day and night and giving relief in medical bills. At the same time, with the help of donors, the people in the surrounding villages were also provided essential food grains, masks and other toiletries to help cope in this situation.

Table 2:

OPD and Indoor patients treated	51617
Relief given in medical bills	1063027
Soap and Detergent Powder distributed to	8500 families
Food kits distributed to families without ration card	620
Cotton, reusable masks distributed	18245
Drawing material related to corona virus and colours were distributed to	350 children
Audio messages regarding Covid 19	305 hamlets of 22 villages
Covid Posters displayed on walls	1500
Patients followed telephonically	591 Pregnant women and 1195 children and 1527 elderly
Supplied weekly study materials to students	69 children of Parodh Balawas
Seeds distribution for Kitchen Garden	98 families

Regular activities

Hospital Services

It is the mission of the organization to cater to the health needs of the community. Access to medical services has always been their need. The organization's 100 bed hospital at Kharel provides rational medical services at concessional rates to the surrounding rural community. To accommodate the increasing medical needs, the hospital provides services in medicine, surgery, gynaecology, paediatrics, orthopaedics, ophthalmology, dentistry, skin, plastic surgery, nephrology, physiotherapy etc. Patients in OPD are given free medicines. People from over 300 villages of Navsari, Surat and Dang Districts benefit from the hospital services. During Covid 19 lockdown, the hospital

continued its services according to the guidelines, given by the government. In view of lock down and economic loss, the hospital fees were reduced from

Rs.50 to Rs.10/- for registration and 25% concession was given in indoor bills.

Table 3:

SN	Department	2019 - 2020	2020 to 2021

	• Dhrishti, District Blindness Control Program, Navsari

Antenatal Care

Qualitative and continuous medical care during pregnancy and delivery helps decrease the risks of maternal and neonatal mortality. To provide such services to the rural tribal women, we conduct free antenatal clinics thrice a week where pregnant women are checked by gynaecologist, blood and urine tests are done and medicines are given. The women are also given safe delivery services at concessional rates or free of cost, in the hospital. This year 3439 pregnant women attending the clinics regularly, out of which 1103 were delivered. 647 (58%) deliveries were free.

Neonatal Intensive Care Unit (NICU)

Around one fourth of the new-born babies in surrounding

villages have low birth weight. Some are also premature. Such babies require intensive neonatal care. Such life- saving services for neonates, are generally available in cities and are very expensive. Rural people do not have access to such services. We provide NICU services for such babies, at our hospital at Kharel, at concessional rates or most of the time free of cost. This year 239 new-born babies were admitted in NICU out of which 216 were saved (90%) and 192 (89%) came for regular follow up throughout the year.

Dialysis Department

An increase in kidney related diseases is seen in the villages. Such patients require dialysis twice or thrice a week. We started the dialysis unit so that these patients get the services

at concessional rates, near their home and hence do not have to travel to bigger towns or cities. This year 2285 sessions were conducted out of which 2254 were free. Those patients who cannot afford these services are encouraged to enrol under the government insurance scheme for the poor, so that they get free services.

Shri Sukhabhai Govindji Eye Department

Cataract is a major health problem in the elderly due to which they become dependent on others. Lack of money and fear are the major causes for not undergoing cataract surgeries. Our eye department provides treatment at low costs and also conducts free eye camps for cataract surgeries every month. This year 379 patients were

Jagubhai Patel (Name changed) aged 53 years and resident of Bamanwada village was sleeping in his home at around 11p.m when a snake bit his leg. He did not have any symptoms of poisoning so he did not inform anybody about the event that night. Next day in the morning when everyone was informed about the incident they brought Jagubhai to Kharel hospital. They also brought the dead snake with them. It was a very poisonous snake called, Krait. But Jagubhai still did not have any symptoms. He himself gave the doctor all information of the snake-bite. But Kraits are known for their poison to affect very slowly. Jagubhai was given primary treatment and kept under observation. After few hours, Jagubhai started asking for discharge as he had no symptoms. After lots of counselling, his relatives were ready to let him stay in the hospital. About 17 hours after the snake bite i.e by evening 5 o'clock, Jagubhai started developing symptoms like blurred vision, difficulty to swallow, headache etc. It took 19 Anti snake venom injections and 5 days of intensive care, to save his life.

**Table 5:**

Particulars	2019-2020		2020-2021		Bhinar(January 2021 onwards)
	Kudkas	Shivarimal	Kudkas	Shivarimal	
Total Visits	51	49	42	42	12
General Patients	3149	1250	1665	764	77
Women	281	81	243	63	37
Children	320	354	161	122	131
Total Patients	3750	1685	2069	949	245

checked and 78 operated and 45 were given free spectacles. Due to Covid 19 lock down guidelines by the government, we could conduct only 6 eye camps this year.

Satellite Centres

The organization runs two satellite centres in interior, hilly, forest areas of Dang District so that the tribal people there have access to health services and do not have to travel 100kms to reach Kharel for minor ailments. Every Thursday and Friday our team of doctors and para medical staff visit these centres, where people from Dang and bordering villages of Maharashtra come

for treatment. While returning those patients requiring further management are brought to Kharel hospital. This year 3263 patients were checked out of which 102 were brought to Kharel for further management.

Annapurna Bhojnalay

Patients hospitalised for medical services come from different villages and sometimes it is difficult for them to get food from their homes. Buying food from outside is also expensive. Hence we started the Annapurna Bhojnalay (Kitchen Services). The kitchen serves free food twice a day to general ward patients and their attendants. This year 42846

free dishes were served to indoor patients.

Medical Relief

As per our experience many villagers avoid medical help due to lack of money. Hence we always try to see that no patient is denied medical service for economic reasons. We provide medical services at very low cost, yet many patients cannot afford these services, hence we give partial or complete relief in their medical bills. This year 52.62% patients were given relief of Rs. 209212192/-. Since last 5 years we also give free medicines to all patients coming to our Out Patient Department (OPD). This year a medicines worth Rs. 1148173/- was given to patients in our OPD. This relief is given through the donations we receive from our donors and well-wishers. We hope and thank you all for your continuous support.

Community Health Projects

Maternal Health Care Project

Healthy mothers give birth to healthy children, hence pregnant and lactating mothers need care, guidance and support during their pregnancy and after child birth. Our workers do home visits of all pregnant women and lactating mothers in the villages, enquire about their well-being

and counsel them and their families, regarding nutrition, antenatal check-ups, medicines, risks, safe deliveries etc. Lactating mothers and their families are also counselled regarding care of new-born babies, breast feeding, nutrition of mothers, kangaroo mother care, family planning methods, signs and symptoms of diseases etc. This year 957

pregnant women were followed regularly till their deliveries and after, under this project.

Child Health and Nutrition Project

Health and Nutritional care is important in early childhood (0 to 5 years) for physical and mental development of children. But lack of awareness in parents

Aakash Halpati, (Name changed) aged 26 years was working in a farm with other farm labourers when he was bitten by a snake. His friends took him immediately to a traditional healer in the village. The traditional healer placed a stone on the wound and kept Aakash there. After some time Aakash's condition started deteriorating. Our community worker was conducting home visits in the vicinity when she heard about Aakash's condition. She immediately went to the traditional healers house and counseled Aakash's friends and family to not to waste time and immediately take him to Kharel hospital. She also called 108 ambulance. The family brought him to Kharel hospital where his condition was critical and required intensive care for three days and was discharged after total 5 days. Thus timely counseling by our community health worker saved the life of a young man.

But there still exists a great need of awareness activities in community regarding snake bite prevention and management.

and families leads to malnutrition in children which has adverse effects on their development. Hence our workers follow all children (from surrounding 100 anganwadis) from their birth till 5 years of age and counsel their families regarding child care, nutrition, immunization, illness etc. Special focus is on first 1000 days of a child (from womb to 2 years), which are crucial for their nutrition and development.

* Due to Covid Lockdown the Anganwadi's have been closed from March 2020 till date. Hence Anganwadi check -ups in field were not possible. We have tried to keep in touch with all children telephonically during lock down and by home visits after that. Parents were also encouraged to bring children to the hospital for regular check-ups. But all parents were not able to do so. Hence we have only given data of those children

who have come to the hospital for check-up. Covid Pandemic, lockdown and economic distress may have increased malnutrition in children, hence we are now trying to get maximum number of children checked in the hospital and treated for malnutrition.

Adolescent Education Project

Adolescence (10 to 19 years) is a phase of rapid physiological changes, both physical and mental. Adolescents are confused about these changes and have many queries which they don't know whom to address to. Hence we usually conduct workshops for adolescents in schools and villages to impart knowledge

regarding these changes, healthy lifestyle, nutrition, addictions etc. This year due to Covid lockdown, schools were closed, hence we could not conduct any workshops in schools. Our field level health workers conducted some health education sessions in villages after the lockdown to address these issues.

Geriatric Project

As people age they are more prone to suffer from non-communicable diseases like Hypertension, Diabetes, Cataract, Arthritis, Sensory Deafness etc. These are due to the aging process of the body and lifestyle changes. Our field level health workers do door to

Table 7:

Sr.No	Particulars	Adol. Girls	Adol.Boys	Total
1	HE sessions/year	57	17	74
3	Avg. attendance / month	369	56	425

2019-20	1464	1363	888	65.15	380	27.87	95	6.9
2020-21	1457	524*	355	67.74	128	24.42	41	7.8

door screening of people aged 50 years and above for these diseases. Suspected cases are further referred to Kharel hospital or Primary health centres and diagnosis is confirmed. Patients and their families are counselled about causes of these disease and lifestyle changes required. Every month patients are followed for compliance. About 90 percent of the patients are taking medicines for diabetes and Hypertension regularly.

Health Education Project

Gram Seva gives equal importance to health education along with screening and management of diseases. Hence health education is incorporated in all our activities, be they clinics, screening and follow ups, camps etc. We conduct health education sessions in hospital

Table 8:

Sr.No	Particulars	Number	Percent
1	Total People (aged above 50 years) Screened	5990	
2	Total People Suffering from Disease	1854	30.83

wards, antenatal clinics, post natal clinics, eye camps, evening sessions for relatives of patients and in villages for various groups like the adolescents, families of children, self-help groups, youth, elderly etc. Various health education aids like flip charts, posters, videos etc. are used. During Covid we displayed posters and distributed brochures on prevention, nutrition etc. in all falias of the villages. Over the years we are seeing an impact of this strategy in the form of increase in awareness regarding

Table 9:

Sr.No	Particulars	Number
1	Ward HE	1107
2	Ante Natal Clinic	112
	Post Natal Clinic	33
3	Night HE in Hospital	74
4	Eye Camp	4

weaning, family planning, immunization of children etc. Health seeking behaviour of the community has increased and bad practises like branding have decreased completely.

Rural Development Projects

Along with health, rural development has been one of the basic objectives of the organization. Today when we are seeing the effects of advanced technology in urban areas of India, the rural areas are still striving for basic necessities. Since last few years, building infrastructure

is equated with development. Yes, basic primary infrastructure is a necessity, but that is not all. Human development is equally important. And Gram Seva has been trying to focus on this aspect of development. In last two years, many of our projects had to take a step back due to

Covid pandemic. Yet we tried to reach to the community by distributing food kits, masks, soaps, detergent powders, drawing materials for children etc. and also tried to continue our activities as much as possible.

Kamlaben Sureshbhai Mahala was a middle aged woman from Khirmanani village in Dang district. She attended one of our Women's Health camps in Dang. Her PAP test for cervical cancer was positive and she had very early stage cervical cancer. This type of cancer can be treated by surgery. But Kamlaben was scared of surgery and refused to undergo any surgery. It took our health workers, about 8 to 10 months of frequent visits and counseling of patient and her family to finally convince them for the surgery. Kamlaben underwent surgery. Since her cancer was in very early stage she did not need any further treatment and her follow up reports are all normal. Today she profusely thanks our health workers for not giving up on her.

Ramesh, a twenty seven year old youth, from bordering Surgana block of Maharashtra had an accident and fell from his bike. He suffered leg injuries. He was taken to a hospital in Nasik where after preliminary examination, his parents were informed that he needed Surgery and it would cost about fifty thousand rupees. The family could not afford the surgery and Ramesh was brought back home. He was treated by local bone setters and quacks. But the condition of his leg deteriorated and he was brought to Kharel by a local leader, three months after his accident. By this time it was too late and his leg had to be amputated. Since Ramesh was poor but had the government insurance card, Gram Seva conducted his surgery under the insurance scheme. Ramesh lost his leg but his life was saved as the infection could have spread throughout his body. He is doing well today and comes for regular follow up. But it is disturbing that a youth lost his leg due to lack of money. When shall the poor have access to qualitative health services?

Financial Literacy Workshops

While working with rural women in various projects, we realised that the women are lacking in knowledge about basic calculations, finance, banking activities, various government schemes, etc. Hence they could not avail the benefits of various resources. As women share an equal responsibility in earning for their families and its development, it is necessary that they are empowered with knowledge about financial matters.

Hence we started the Financial Literacy Workshop for women groups in villages. The workshop module is developed keeping in mind their education level, local language, attention span, interests etc. Hence various activities, games and role-plays are incorporated. The workshop is activity based, thus making it interesting for the women. Due to Covid restrictions we could not continue with our workshops. Only one workshop comprising of 31 women was conducted. We hope to continue with these

workshops as the restrictions have been lifted.

"I did not know how to calculate interest rate. I learnt it in this workshop. Earlier when I was asked to pay a certain amount as interest I used to give the money without calculating. But now I can calculate the interest and it makes me very Happy"

Manishaben Patel, Gandeve Mazla falia

'Shabri' Women Development Centre

The Tribal women of Dang District face many health problems. One of them being lack of menstrual hygiene. There are many villages in Dang where sanitary napkins are still not available. Lack of livelihood activities is also one of their problems.

Hence seeing these two needs of the women, we started the Shabri Women Development Centre with the support of Manav Kalyan Trust. Women are trained to make low cost, eco-friendly sanitary napkins. Machines for which were donated by Ganga Hansji Foundation. Depot holder women are being developed in

villages, who shall teach young women about menstrual hygiene and sell these napkins. Thus women have access to hygienic products and also earn livelihood by the sale of the napkins. 29 women from 25 villages are involved in these activities. We also plan to start sewing class and other need based and area appropriate income generation activities in near future.

"Pustak Parab" Public Library for Children.

Children in villages have been hugely affected by this pandemic. Not only are their studies affected but they are deprived of any opportunity of social development. The rural villages lack of any development facility for children. Hence village children are deprived of opportunities and exposure to activities that may support their holistic development.

To bring the children back to the wonderful world of books with stories, information, poems etc we have started a public library for children. Every Sunday children can come and go through different books, take

home a book they like and also participate in different activities arranged for them. We hope that this will increase a love for books and reading in the children and thus help their development. Covid lockdown also affected this activity, but we hope that it will increase now with decrease in restrictions. We request all our friends to please donate used books and board games only in good condition if possible, for these children.

Kitchen Garden Project

Majority of the women in villages suffer from anaemia, in spite of having some resources to grow iron rich vegetable. Lack of awareness is the major reason for this malady. We encourage women to do Kitchen gardening so that their families get nutritious vegetables, especially iron rich ones. They not only save money but can also earn some by selling them. Gram Seva also provides them with good quality seeds. This year due to Covid we could not conduct any awareness programs or training activities. Yet 67 women continued to grow

vegetables. In three months, they grew an average of 50 kg of vegetables per family. We plan to conduct more awareness activities so that they consume these vegetables and improve health of their families.

Sangee Sanitary Napkins Project

Women in the villages did not have access to low cost sanitary napkins for menstrual hygiene. Hence we started this project with the aim to provide low cost eco-friendly sanitary napkins to young women in their hamlets. Also, develop a source of livelihood for the rural women through manufacturing and sale of Sangee sanitary napkins. The added advantage is that these napkins are made with environment friendly materials thus preventing any pollution and any adverse health effects. Awareness sessions are also conducted for women, to teach them the use of sanitary napkins, their benefits and their disposal methods. This year about 156 local women joined this project

and sold around 45157 packets. Thus earning Rs.3,07,676/- as their income. We want to form a federation of women in near future. It is our dream that women entrepreneurs develop in villages through these activities.

'Childline 1098' services

Children are vulnerable group in society and need to be cared and looked after. Child rights is an important aspect of Child Safety and Development. Gram Seva has always been focused on Child Development. Our Childline team works in Navsari district and provides help and support activities for children aged 0 to 18 years, through the 1098 helpline services. These are 24 * 7, free services and any child or parent or guardian or any well-wisher can call on 1098 to avail these services. This year 104 cases were registered regarding violence, child marriage, child labour, information of government schemes etc. Thus the organization tries to help the vulnerable children and promote their development.

Anitaben, 31 yrs old, resident of Ranveri Khurd village was pregnant for the first time after 10 years of marriage. This pregnancy was precious to her and her family. But she was suffering from severe anaemia. Hence she was treated with iron supplements due to which her haemoglobin had increased to 10 gm%. She suffered from labour pains in April 2020 and was brought to Kharel hospital, early in the morning. On admission it was found that her blood pressure was high. This was detrimental to the baby and since this was a precious pregnancy, after many years of marriage, it was decided to conduct the delivery by caesarean section. A 2.6kg baby was delivered. But Anitaben's uterus was not contracting due to which she was losing lots of blood. She needed urgent removal of uterus and lots of blood and plasma transfusions. Due to covid 19 pandemic, the country was under lockdown. It was difficult to obtain blood. Hospital ambulance was sent to the blood bank and 2 bags of blood was obtained urgently. Till then her uterus was removed. Later she was transfused 4 more bags of Plasma. After 2 to 3 days intensive care our team was able to save the mother and she was discharged from the hospital. The baby also suffered from fever and needed NICU care. Thus both mother and child were saved in spite of covid pandemic and lockdown everywhere.

Mahesh (name changed) was a student of std. 7th in Khambla Primary school. One of his finger on right hand was swollen since last three years. Treatment at local primary health centres and government hospital did not bring any improvement. He was even started on anti TB treatment. But slowly the swelling and pain was increasing. Mahesh had difficulty in doing any work or even concentrating on his studies. Mahesh's school principal had heard about Childline 1098, for children in distress and called the helpline to seek assistance. The childline Navsari team immediately visited Mahesh and his family and counselled them to come to Kharel for further investigation. His family was reluctant as they had spent a lot of money on medicines and investigations and were frustrated. Still after a lot of counselling by Childline and his school principal, they brought Mahesh to Kharel for expert opinion. Mahesh was diagnosed with bone cancer and needed immediate surgery. Since they were poor, they were advised to go to Ahmedabad Cancer Hospital, where they would receive medical management with minimum expense. The family was from an interior village. They were initially reluctant to go to Ahmedabad, as they felt lost in the large and overcrowded hospitals. Yet they were convinced and a person from the village was ready to go with them as support. But again they were not comfortable in the big city and its overcrowded hospital, where they had to run from one building to other for investigations and treatment. They came home, determined to never go back again. After lots of counselling by our staff, who also helped his father in preparing the government insurance card and networking by our doctors with private doctors in Surat, we could manage to get Mahesh's surgery done in Surat. Before that our team had to talk with the villagers and generate donations for travelling expenses. Thus team efforts by school principal, childline, our staff, doctors and villagers helped a child get his treatment. Which shows that access to medical services for a poor family in interior areas is very difficult and takes a lot of team effort.

Other Activities

'Crossing the river called exams'

10th and 12th std. students are usually stressed out as the board exams approach. Many face stress related severe psychological problems which may lead to taking drastic steps in life. To decrease the fear in children and teach them that true success in life is not dependent on exams but on hard work and passion, we had some dialogues with 304 students. Students were also advised to call 1098 helpline in case of any doubts. Oasis foundation, Vadodara is our technical support for this activity.

Blood Donation Camp

31 units of blood were donated by our staff in the blood donation camp arranged on 19th December 2020. The camp is organized annually with the support of Indian Red Cross Society Navsari.

Corona Warriors Vaccination

Our major activities are related to health services and they were continued during the covid pandemic. Hence our staff, who were daily coming in contact with patients, was vaccinated against Covid 19 infection, with the support of Dhanori Primary Health Centre. Total of 130 staff members were vaccinated in 4

sessions.

New Equipment, Constructions etc.

With advance in technology the organization also needs to upgrade its instruments and equipment as the need arises, so that we can offer quality services to the patients. With the help of Gujarat Chemicals Ltd, we could install Bubble CPAP with Inbuilt Compressor, High flow nasal oxygen Unit, 2D Echo Machine and HLC Analyzer for Sickle cell disease.

Mr. Sanjay Shah and Mr. Mayur Shah ALPHA MEDTHRIFT SCIENTIFIC CO (AMSCO MEDICAL) USA, supported us for construction of Dialysis Centre.

Ms. Angela and Mr. Virendra Patel (U.S.A) Ms. Sumitraben Balwantbhai Desai Ganesh Sisodra and Mr. Mahendra C. Desai and Mrs. Manjulaben M. Desai (U.S.A) supported for construction of General Ward and Ambulance. Dr. Veena Puri (U.S.A) generously donated for DEIC renovation, equipment and children welfare fund.

Gram Seva Foundation donors also supported various activities

of the organization.

Fire Safety Demonstrations

Every year we try to do fire safety demos for our staff. This year due to Covid pandemic and increase use of oxygen and ventilators, it was necessary to be prepared for any mishap. Thus staff were demonstrated how to use the fire cylinders and also what actions to be taken in case of any

accident.

Our new members

Dr. Manoj Patel M.D. Medicine and Dr. Neha Patel, M.D. Paediatrics joined us this year as Physician and Paediatrician respectively. Dr. Viral Shah (Paediatric Nephrologist), Dr. Prachi Shah (Paediatric Endocrinologist) and Dr. Jay Patel, Neurophysician joined us as visiting Consultants.

Hospital Covid Ward during the Second Wave of Covid 19 infection

The beginning...

The organization had distributed food kits, masks, soap and detergents in surrounding villages during the first wave of covid infection last year. But the second wave of covid this year was worse than the first and a real shortage of doctors, hospital beds, oxygen, ventilators, medicines, ambulance services and other equipment was felt. Patients and the health care system was at a loss about what could be done. At such juncture, our hospital which could provide minor support was in two minds. Since this was an infectious disease, it would affect all our other non covid patients especially pregnant women and children coming to the hospital. Most other centres were not catering to non covid patients. The covid patients needed to be kept separately away from other patients, with separate staff and separate equipment like oxygen supply, ventilators, Bi-PAP machines etc. On the other hand people were suffering

for lack of services and we could support at least a few of them. In the end the need for covid management was perceived as urgent and large in magnitude, hence on humanitarian grounds, it was decided to start a covid ward in the hospital from 3rd May 2021.

Challenges and their management

Our first challenge was how to separate covid and non covid patients. The wing with Ward number three was chosen as covid wing. Hence Gynae OPD, Dental OPD, Physiotherapy

department and obstetric ward were shifted to other side. Since oxygen supply was vital in management of covid, an oxygen pipeline was urgently installed in ward number 2. An air conditioner was installed in the room designated as ventilator room for patients. Two to three partitions were immediately created so that covid and non covid wings were completely separated. Equipment was purchased as per the need. A list was prepared of the staff designated to work in the covid ward. To our pleasant surprise, no staff objected to work in covid ward. Instead all worked for extra hours as we were short of staff due to strict division of staff for covid and non covid patients. Those staff members who never had night duty regularly, accepted them without any hesitation. Since

Covid Ward in Hospital from 3rd May 2021 to 12th June 2021

1	Total Patients admitted	79
2	No. of Patients Recovered	51 (64.55%)
3	No. Of Patients Referred	9 (11.39%)
4	No. of Patients who took discharge against medical advice	7 (8.86%)
5	No. of patients expired	12 (15.18%)
6	No. of Patients kept on Bi-PAP	14 (17.72%)
7	No. Of Patients kept on Ventilator	7 (8.86%)
8	Medical Relief in Bills	Rs.1161670/-

relatives of the covid patients were not given permission to come in the ward, they had to be supplied with three meals and nutritious snacks, soups, juice etc in between. Hence disposable plates, bowls, glasses were procured. A 24 hour help desk was setup where relatives could call and enquire about their patient, or about vacant beds etc. A separate canopy was put up so that relatives of patients had some shelter to sit.

Officials from the Gujarat Electricity Board, Fire safety department and Police department, would frequently come for inspection and their recommendations had to be immediately followed. New challenges would come up every day as work progressed. Staff had to go up and down the stairs frequently for deliverables for

the patients. In the end it was decide to tie a bucket to a rope and use it to transfer things.

Since we had done a M.O.U with the government, twice a day all information regarding covid ward patients was sent to the government as per the guidelines. Everyday, the full or vacant status of the number of beds, had to be displayed for others.

A major challenge was getting oxygen supplies, remdesivir injections and other supplies regularly from Navsari or other towns. Our vehicle drivers did not object to such frequent trips whether in day or night. Our ward boys had hard time, while transferring oxygen cylinders, but never a word of regret. These incidences taught us a lot.

We had never done such work before and this was a new

experience for all of us. Our biggest support were our donors and well-wishers from India and abroad, who had started calling or writing to us expressing their willingness to support any activity we may plan and inquiring about our needs. Their support was very motivating and gave us strength to go ahead. Their financial support helped us to give very good services to the patients. Our other strength was the team work, dedication and integrity displayed by our staff. Patients and their relatives gave great reviews for our services at the time of discharge. Though we had kept minimal charges for treatment, yet many patients were unable to pay them and hence we had to give partial or complete relief in their bills. This was all possible with the monetary support of our donors.

Acknowledgement

We heartily acknowledge and thank all for their help and support and we take this opportunity to express our heartfelt gratitude.

- All the well- wishers and donors in India and abroad who support us in achieving our objectives.
- United Healthcare for the Rural Underserved (UHRU) U.S.A. for their monetary support to our AAA project, Mental Health project and

Covid 19 activities.

AUDITORS' REPORT

(Under sub section (2) of section 33 and 34 and Rule 19 of the Bombay Public Trust Act 1950)

Registration No. : E/896/Navsari
 Name of the Trust : GRAM SEVA TRUST
 For the year ended : 31st March 2021

We have audited the annexed Balance sheet of GRAM SEVA TRUST [(Reg.No E/896/ Navsari) situated at : N. H. No. 48, At & Post: Kharel, Dist: Navsari 396430] as on 31st March 2021 as well as Income and Expenditure Account for the year ended on 31st March 2021.

We have conducted our audit in accordance with auditing standards generally accepted in India. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

- The accounts are maintained regularly and in accordance with the provisions of the Act and Rules
- The receipts and disbursements are properly and correctly shown in the accounts
- The cash balance and vouchers in the custody of the treasurer or trustee on the date of the audit were in agreement with the books of account
- All books, deeds, accounts, vouchers or other documents & records required by us were produced before us.
- A Register of movable and immovable properties has been maintained and the changes therein have been furnished to us.
- All the necessary information required by us has been furnished to us by the Trustees personally whenever called upon
- No property or funds of the Trust were applied for any object or purpose other than for the object or purpose of the Trust
- There are no amounts which are outstanding for more than one year and written off
- For repairs, tenders are not invited but for construction involving expenditure exceeding ₹ 5000/-, tenders are invited
- The money of the trust have not been invested contrary to the provisions of section 35 of the Act.
- There is no alienation of the immovable property contrary to provisions of Section 36
- There are no cases of irregular, illegal or improper expenditure or failure or omission to recover money or other property belonging to the public trust or of loss or waste of money or other property thereof.
- The provision of Budget to be filed under Rule in the form under Rule 16A is not applicable to the trust. However, the Trust has policy to prepare the Annual Budget.
- The maximum and minimum number of trustees is maintained during the year.
- The meetings are held as provided by such instrument.
- The Minutes Books of proceedings of the meetings are maintained.
- None of the Trustees has any interest in the investment of the trust.
- None of the trustees is any debtor or creditor of the trust.
- The irregularities pointed out by the Auditors in the accounts for the year under audit are have been duly complied with by the trustees.
- There is no special matter, which we think fit or necessary to bring to the notice of the Deputy or Assistant Charity Commissioner

Gram Seva Trust
Dr. A. A. Shah
(Managing Trustee)

You can help us...

Gram Seva Trust strives for Health and Development of Rural Communities, especially, its weaker sections like women, children and the elderly.

The activities of the organization depend on donations and hence there is a perennial need of donations and help. We sincerely request you to join us in these activities through your voluntary donations in cash or kind for the following:

Permanent Donations Scheme

1. Poor Patients Relief Fund.
 2. Eye Care Fund.
 3. Bhojnalay(Kitchen) Fund.
 4. Women Empowerment Fund.
 5. Children's Welfare Fund
 6. "Parodh Balawas" Funds
- } Interest shall be utilized from Corpus fund.
7. Anniversary Donations: these are donations on birth, death or any other anniversaries for treatment or food for the patients. The interest on the amount shall be utilised on the same day every year for the same purpose. ₹. 21000/- for this fund is accepted. The Donors name shall be displayed on a board that day.
 8. 1100/- (10 U.S.\$) for One Meal for Hospital Patients & - ₹. 2100/- (20 U.S.\$) for Two Meals
 9. 1100/- (10 U.S.\$) One Meal for "Parodh" Balawas children- ₹. 2100/- (30 U.S.\$) for Two Meals
 10. Eye Camp- An eye camp and free cataract operations of all those coming in the camp are organised on donation of ₹. 40000/- (800 U.S.\$) and ₹. 1500/- (25 U.S.\$) for one cataract operation.
 11. Support Education Expense of One Parodh Balawas Child: ₹.36000/year (600 U.S.\$/year)
 12. General Donation

We also need donations for hospital and Balawas equipments. Kindly contact our office for more information.

We shall be happy to receive voluntary services in any of our activities like child education, skill development of youth and women, development of database, IEC materials, library, documentation etc.

Donations can be sent through cheques, Demand drafts or direct transfer, in the name of Gram Seva Trust.

All donations are tax exempted under 80G in India.

Donations in U.S.A, can avail tax exemption if donated to Gram Seva Foundation a 501(c)(3) tax exempt charitable non profit.
